- + Quality Assurance
- + Monitoring and Evaluation
- + Warehouse Management for Health Systems
- + Managing Transport and Distribution of Medicines Up to the Last Mile
- + Logistics Management Information Systems in Healthcare

## READY FOR AN EXERCISE?

**Which one of the following statements is false about the current situation on human resource capacity for health supply chain management (HSCM)?**

- Education on HSCM is well integrated into university and technical school curricula.
- The division of responsibilities for logistics function becomes less clear at lower levels of facilities.
- One of the six barriers to access to medicine is inadequate human resources.
- There is a lack of training on SCM for health.

**You can find the correct answer on the home page** [↪](#)

My regards and warmest appreciation go to the facilitator for the countless efforts making this course a success. *(Liberia)*

All my honors to our Facilitators, to our computer scientist and to all the actors. Kudos to i+academy. *(Tchad)*

The teaching method is quite relaxed and allows understanding *(Benin)*
